

# Your FUTURECOOPERATIVE

## Creating and living values

- ☉ Would you like to help build the FUTURECOOPERATIVE, a community that was founded for the benefit of people, animals, nature and the environment?
- ☉ Do you feel like bringing sustainable, ecological products and innovations into the world?
- ☉ Does it inspire you to create and implement together with like-minded people?

**3 x YES, wonderful, we are very happy!**

Feel free to contact us for an initial exchange:

# Economizing optimally, living healthy, investing sensibly.

We use sustainable, organic, naturally healthy products and recommend them to others

- ④ We use sustainable, organic, naturally healthy products and recommend them to others
- ④ Together, we build a strong participation, business and common good relationship network
- ④ We aim to participate in our partner companies and thereby be-come co-owners

We have made it our mission to contribute to and promote global change in consciousness. Various technological and social innovations are used to publicize and support sustainable lifestyles.

Our goal is to enable all living beings to live in dignity and peace in harmony with nature. Changes to this begin in everyday life, through education and information, knowledge forums and information from the innovators.
